1. Welcome

Welcome to KeyPoint Technologies® AdaptxtTM text entry solution for hard and soft keyboard devices. This user manual explains how to use Adaptxt keyboard on Android mobile device. KPT also provides an online support section on the website: www.adaptxt.com

2. Abbreviations & Keyboard Functions

Abbreviations	Keyboard Functions
• KPT - Key Point Technologies • ATX - Adaptxt • ATR – Automatic Text Replacement • SIP - Soft Input Panel • Sbar - Suggestion Bar	• - Quick Settings key • - Post to social key • - Undo auto correction key • - Clipboard key

3. What is Adaptxt?

Adaptxt is the next generation of text input software, providing text entry assistance on hard keyboard and touch-screen devices. Adaptxt powered by Predictive Text2.0 engine provides accurate and relevant next word prediction, error-correction & word completion inputs by combining the best of artificial intelligence and computing technology.
As the user starts typing, the Adaptxt keyboard provides word suggestions in the **Suggestion Bar** and starts learning and adapting to the user's writing style to provide personalized suggestions. Adaptxt provides two types of add-on dictionaries:

- **Language dictionaries:**
  These dictionaries work simultaneously and provide multilingual suggestions to users who need to move quickly between different languages during text input. Each dictionary comes with a language specific on-screen keyboard.
- **Specialized dictionaries:**
  These dictionaries provide industry-specific terminology, acronyms, company names and web addresses. They cater to different professional sectors such as Medicine, Business, Law, Finance, and IT & Telecom. These dictionaries are also available in multiple languages.

  The Language and Specialized add-ons can be downloaded from **Adaptxt Store**, as explained in the following sections.

4. Setting up Adaptxt

Adaptxt can be downloaded from the Google Play Store, GetJar or the Amazon Appstore and installed directly on the mobile device.

Once Adaptxt has been downloaded on the phone, tap on the Adaptxt icon

from the phone menu and the following screens would appear sequentially through the installation process (1-8).

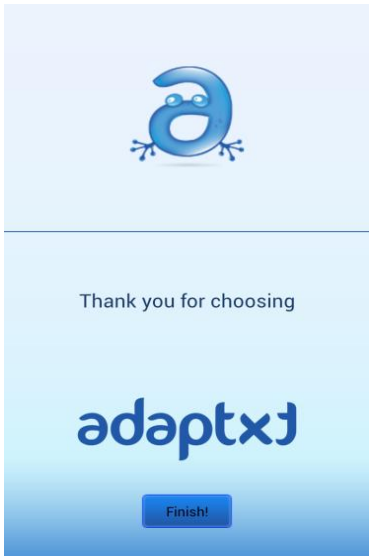

Image 8

1. Tap on **Accept>Setup>Next**
2. When the **Adaptxt store** screen is displayed, tap and download the **Language/Specialized** add-ons required.
3. Tap on the **Back** key>**Next**
4. Enable **Adaptxt** in **Keyboards and input methods>Next**
5. Select and set **Adaptxt** as the default keyboard from the list.
6. Tap on **Finish**.

The on-screen keyboard and the word suggestions in the **Suggestion Bar** will correspond to the language priorities defined in the Adaptxt settings.

5. Predictive and Multi-tap Mode

On the Phone Keypad, text can be entered using Predictive mode or Multi-tap mode, to switch between both modes tap on the **ABC Key**

as seen below.

- In **Predictive mode**, only one key press is required to enter each character. For example, to enter the word "text", tap the following keys once: 8, 3, 9 and 8. Adaptxt will also provide other possible matches for the same key sequence.
- In **Multi-tap mode**, tap on each key multiple times to get the desired character. For example, to enter the word "text", tap on the following keys in sequence with a gap of about a second between them. For "t"- tap on key 8 once, "e" - tap on key 3 twice, "x" - tap on key 9 twice, and "t"- tap on key 8 once.

6. Voice Input

- Press and release the **Microphone Key** to activate voice input and enter text through voice recognition. Start speaking as soon as the "Speak now" message appears.

7. Dictionaries

7.1 Language and Specialized Add-ons

The language and Specialized add-ons can be installed during the installation process or later from Adaptxt store. These add-ons are designed to work simultaneously and provide multilingual suggestions to users who toggle between different languages while typing.

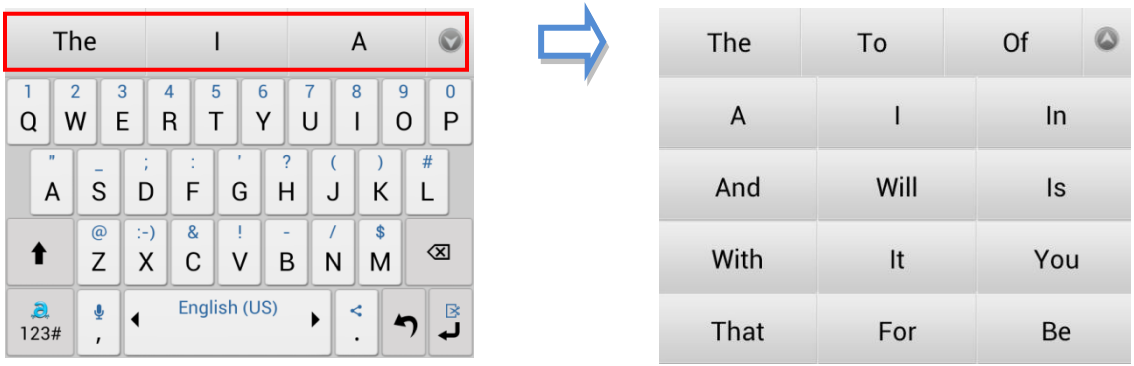
KPT PROPRIETARY
Copyright© 2013, KPT, All rights reserved.

7.2 Changing Add-ons

- Swipe across the **space bar key** to switch between various add-ons while typing.
- The name of the selected add-on will be displayed on the space bar of the keyboard.

8. Using the Suggestion Bar

- Adaptxt offers error corrections and relevant word predictions on the suggestion bar while typing. This feature enables the user to type less and write more using the personalized suggestions.



- The **Suggestion Bar** above the keyboard provides auto correction and next word predictions that are relevant to the context being typed.
- Tap on any of the suggestions to enter it in the text.
- To view more suggestions, tap on , which expands the suggestion bar as shown above.
- Adaptxt provides auto spacing for punctuations in the form of smart punctuations while typing.

9. Search Meaning of Words

- Long press on a word in the Suggestion bar will allow the user to look up the meaning of the word on Wikipedia; the user will be directed to the link with the word's meaning and other relevant information.

(August 2012)
Adaptxt is a predictive text application for mobile phones, developed by KeyPoint Technologies, a UK-based software company. The application is designed to improve text entry on mobile devices by making it faster and error-free. It achieves this by predicting the next word as well as the word being typed, continuously adapting to the user's writing style and vocabulary.

10. Deleting words

- Place the caret within the word's premises and tap on the **Bin** symbol to delete the word (Image 9 and 10).

Image 9 Image 10

11. Clipboard View

- Long press on the "Enter/Clipboard" key to access the clipboard features. it includes the following features:

KPT PROPRIETARY
Copyright© 2013, KPT, All rights reserved.

1. **Cut:** Tap on the key to cut and save the selected text.
2. **Copy:** Tap on the key to copy and save the selected text.
3. **Paste:** Tap on the key to paste the copied text.
4. **Select:** Tap on the select key to activate the feature, then use the navigation key to define the starting point of the text selection and use the Right/Left key to select/de-select the text accordingly. (Image 11.
5. **Backspace:** Tap to delete the text.
6. **Navigation Keys:** The **up, down, left** and **right** keys can be used to navigate across the editor fields and select text.
7. A shortcut key to access the keyboard.

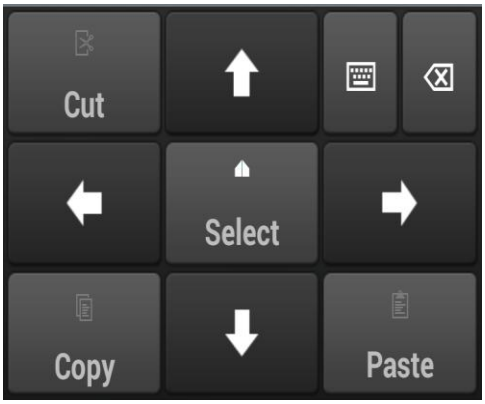

Image 11

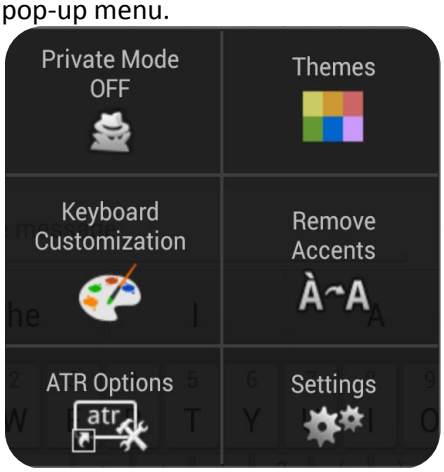
12. Adaptxt Quick Settings Screen

This key can be used to access frequently used features and customization options.

- Long press and release the **Quick Settings key** to get the pop-up menu.
- **Quick Settings** gives access to the following features:

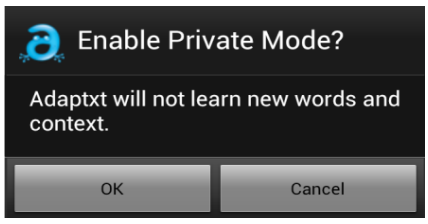


- **Private Mode:** With private mode on, Adaptxt dictionary does not learn user typed words.
- **Themes**: Tap to select the preferred theme.
- **Remove Accents:** Tap to remove all accents or diacritics from the text entered.
- **Keyboard Customization**: Users can select the color of each keyboard element, swap keys, resize the keyboard elements and have access to other valuable features.
- **Settings**: A shortcut key to access all the Adaptxt settings.
- **ATR Options**: Allows adding and deleting of ATR shortcuts.

12.1 Private Mode

Using the Private Mode feature, the user can prevent Adaptxt from learning new words.

- **To access this feature**: Long press and release the **Quick settings key** > Tap once on **Private Mode** to **enable** it and tap twice to **disable** it.
- By default Private mode is always switched **OFF**.
- While enabling '**Private Mode**', the following pop up screen is displayed:



- Press **OK** to enable Private Mode.
- When '**Private Mode'** is switched on, as an indication the suggestion bar will display a small icon at the top left side as seen below.

KPT PROPRIETARY
Copyright© 2013, KPT, All rights reserved.

- Tap on '**Private Mode ON'** to switch it **OFF**. The Adaptxt learning engine will start learning the entered words again.

12.2 Remove Accents and Diacritics

Remove Accents and Diacritics feature can be accessed in the following way:

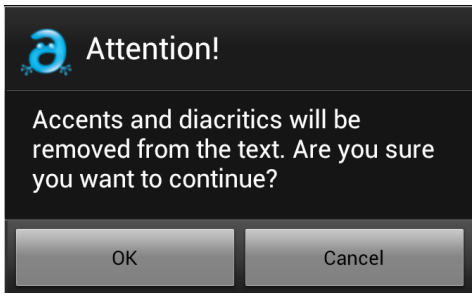
- Long press and release the **Quick settings key**

>Remove Accents and Diacritics to use it.

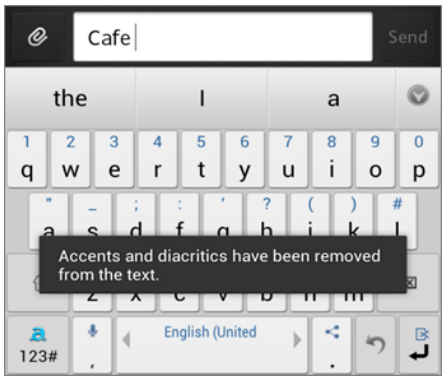
Example:

1. If the text entered is *"***Café***"* as shown below:

2. Select and tap on the Remove Accents and Diacritics option.



3. A notification will be displayed.



4. The accents / diacritics free text will be rendered as "**Cafe".**

12.3 Keyboard Customization

- Keyboard Customization is offered as a premium feature that can be purchased from the Adaptxt store.
- Long press and release the **Quick settings key**

>tap on **Keyboard Customization.**
- Tap on **Adaptxt Settings >Keyboard Customization.**

13.1 Adaptxt store

- **To access this feature:** Tap on **Adaptxt Settings >Adaptxt Store**
- The Adaptxt store screen provides options to enable, disable, and download themes and add-ons.
- It has four main tabs, which are further divided into various tabs as explained below:

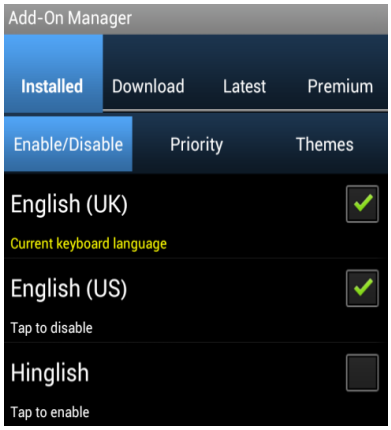
1. **Installed**
   i. Enable/Disable
   ii. Priority
   iii. Themes
2. **Download**
   i. Language
   ii. Specialized
   iii. Theme
3. **Latest**
4. **Premium**

Installed

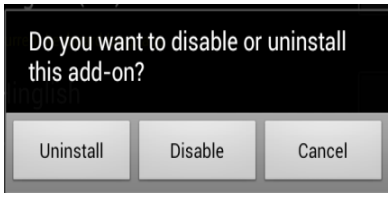
- **To access this feature:** Tap on **Adaptxt Settings >Adaptxt Store>Installed**

1.1. Enable/Disable

- In order to start using Adaptxt, at least one add-on dictionary needs to be installed and enabled.

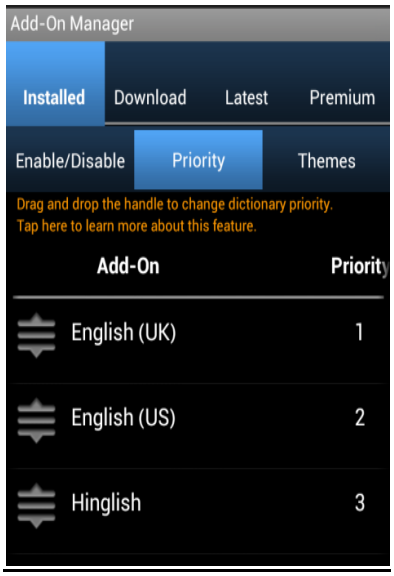


- Tap on the add-on to enable, disable or uninstall it accordingly.



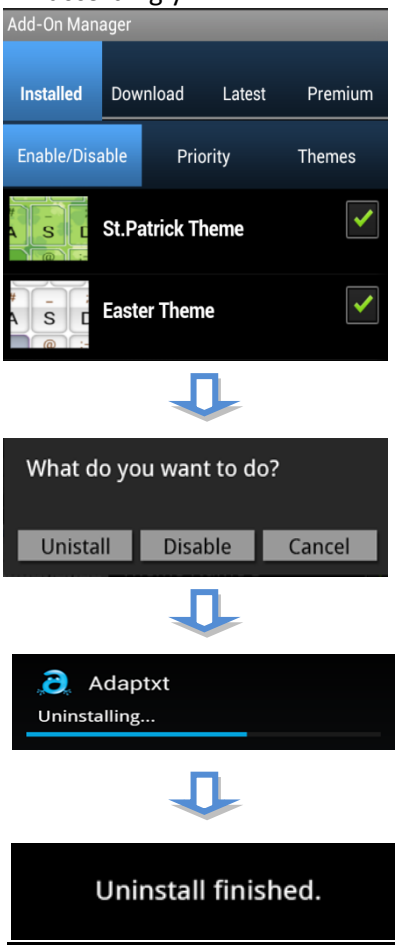
1.2. Priority

- Tap on the **Priority** tab.
- Drag and Drop any of the add-ons using the scroll handle on the left to change dictionary priorities.
- Word suggestions and error corrections will be generated based on the prioritized add-ons.



1.3. Themes

- Tap on the installed theme to Uninstall or Disable it accordingly.



Download

- **To access this feature:** Tap on **Adaptxt Settings >Adaptxt Store>Download**
- **Note:** Specialized Add-ons and Themes are available for a one-time charge; the user can re-install a previously purchased add-on/theme without any recurring fee.

KPT PROPRIETARY

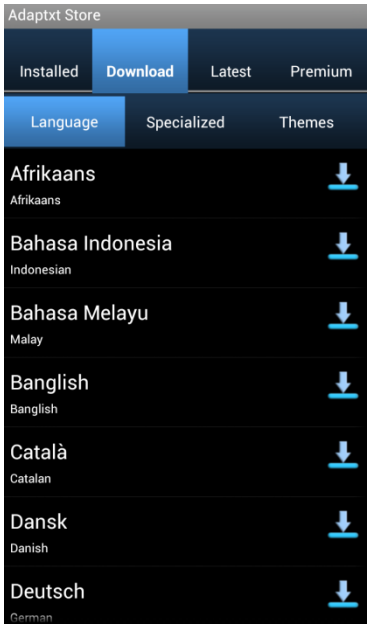
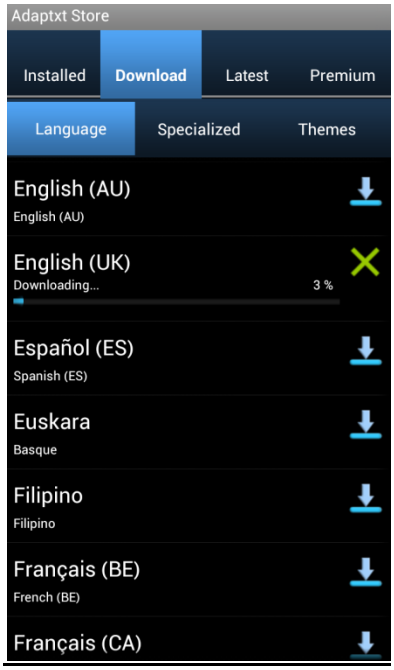
2.1. Language

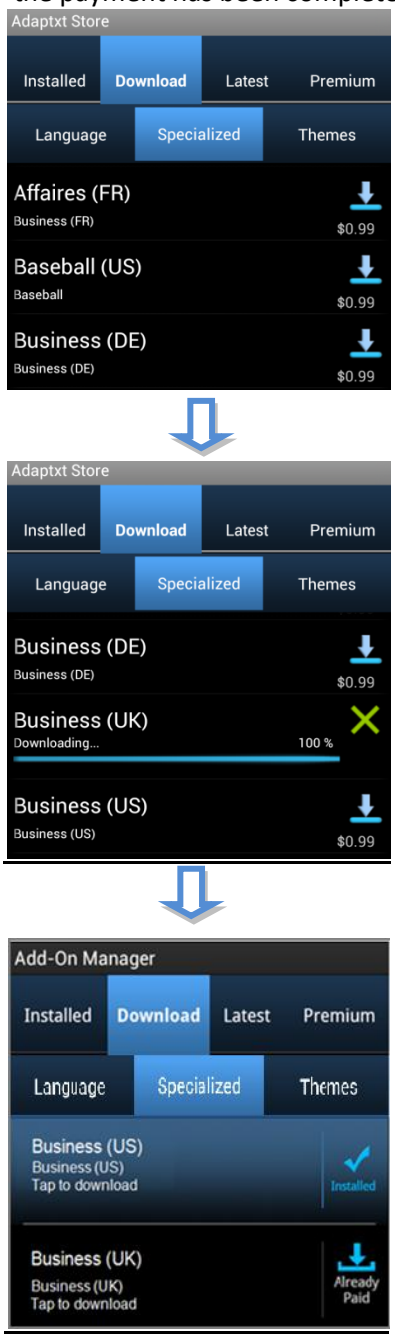
- It provides a list of all available language add-ons.
- Press the **Menu key** to enable the **Search** field.
- Tap on the language add-on to download it.





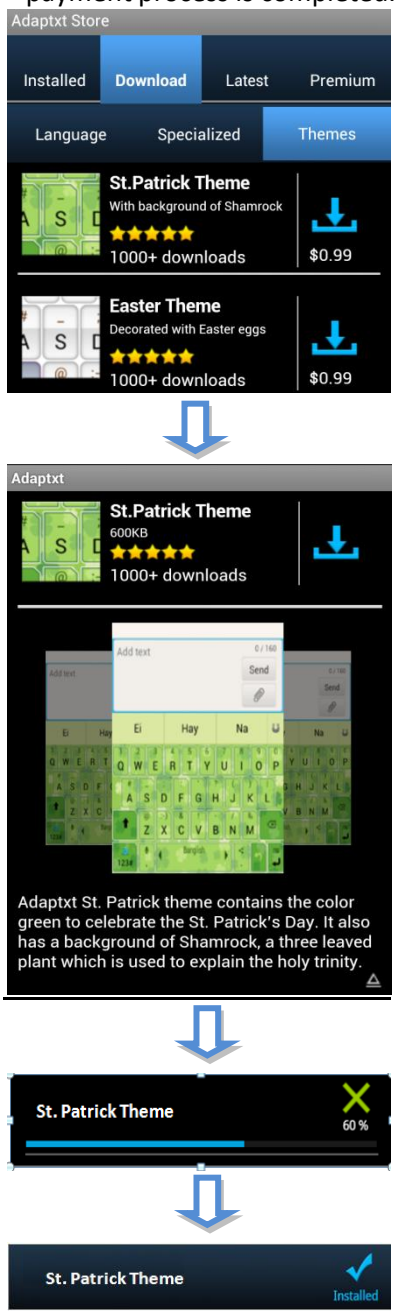
2.2. Specialized

- The **Specialized** add-on tab includes the list of all industry-specific dictionaries available. These add-ons need to be purchased.
- Tap on the add-on to download.
- The user is then directed to the Playstore payment page.
- The add-on is downloaded after the payment has been completed.



2.3. Themes

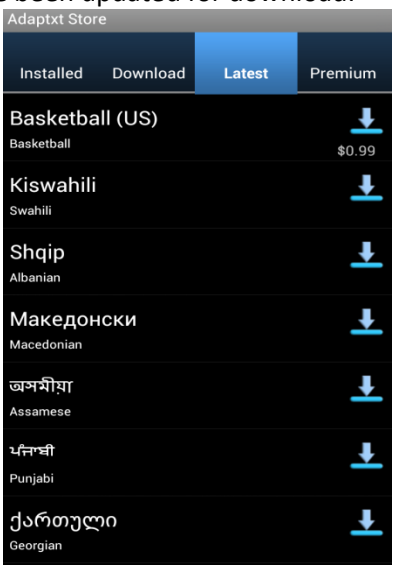
- The **Themes** tab includes all special & event based themes.
- Tap on the theme to view its description.
- Press the download icon, the user is then directed to the Playstore payment page**.**
- The theme is installed after the payment process is completed.



KPT PROPRIETARY
Copyright© 2013, KPT, All rights reserved.

Latest

- **To access this feature:** Tap on **Adaptxt Settings >Adaptxt Store>Latest**
- Displays list of latest languages that have been updated for download.



Unlocking Premium Features

- **To access this feature:** Tap on **Adaptxt Settings >Adaptxt Store>Premium**
- **Note:** Premium features are available for a one-time charge; the user can re-install a previously purchased feature without any recurring fee.

- Adaptxt provides Premium keyboard customization features that can be accessed in the following process:
  - Tap on the lock icon to unlock the premium features.
  - The user is then directed to the Playstore payment page.
  - The premium features are unlocked after the payment is completed through the app store.
  - Finally, the unlocked confirmation icon is displayed and the user can access and utilize the premium features.

13.2 My Dictionary Screen

- **<u>To access this feature:</u>** Tap on **Adaptxt Settings > Personalize Suggestions > My Dictionary.**
- This screen is used to view and manage all user specific words .By default Adaptxt learns user typed words and adds them to the personal dictionary (passwords are not learnt). Words are not learnt when **Private Mode** is turned **ON**.

<u>Main functions in My Dictionary</u>:

- **Back up My Dictionary:** Select this feature to back up all the user specific words saved in the personal dictionary (Image 13)
- **Restore:** used to restore words that were previously saved.
- **Delete word:** Tap on the bin symbol adjacent to the word to be removed from My Dictionary.
- **Delete all:** Select **Delete all** > **Press OK** (Image 14.
- **Add:** Tap on **Add** > Type the word that needs to be added >Press **OK.** Only unique words can be added to the user dictionary (Image 15)
- **Search:** Tap on **Search** > Type the word in the search field to look for it (Image 16).

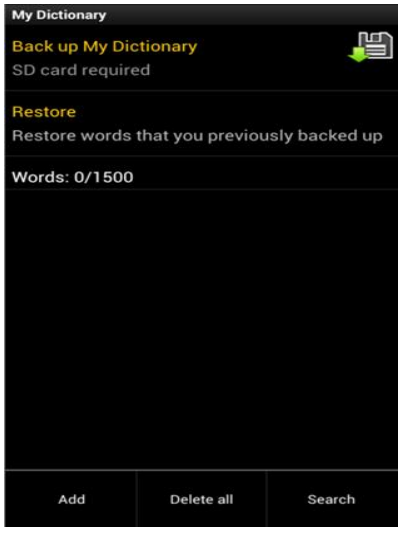

Image 13

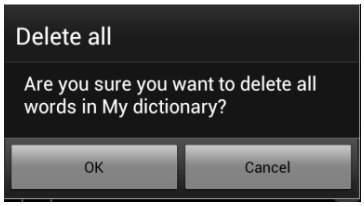

Image 14

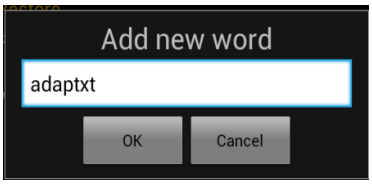

Image 15

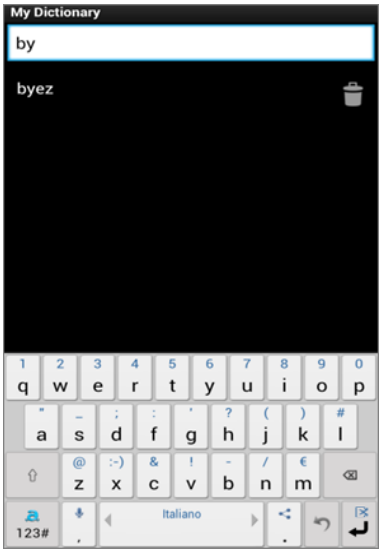

Image 16

13.3 Learn from

- **To access this feature**: Tap on **Adaptxt Settings > Personalize Suggestions > Learn from.**
- This feature allows Adaptxt to learn data from contacts, social networking accounts and messages to provide personalized suggestions.

13.4 Social Account Manager

- **To access this feature**: Tap on **Adaptxt Settings > Personalize Suggestions > Social Account Manager.**
- The user can add/remove social accounts here.
- Press and hold the "**Share**" **Key** in order to post the current message to social networks like Facebook and Twitter.

13.5 ATR (Automatic Text Replacement)

- **To access this feature**: Tap on **Adaptxt Settings > Personalize Suggestions > ATR.**
- ATR can also be accessed through the **Quick Settings key** also.
- ATR or Automatic Text Replacement allows the user to assign a certain text or phrase to a shortcut. The user can create custom shortcuts for multiple phrases.
- The ATR shortcut is displayed in a **blue** font color in the suggestion bar. All shortcuts are displayed by a distinct "+" symbol before the text.

13.6 Shortcuts and Expansions

- Tap on **Shortcuts and Expansions** option to access the ATR screen.
- Tap on the **menu** button to add or delete shortcuts (Image 17).

Note:

- The user needs to type in the entire shortcut, for the expansion to appear in the Suggestion bar (Sbar).
- **Generate ATR Shortcut** can be used to generate a shortcut automatically based on the expansion entered.
- ATR is **enabled** by default, tap the check box to enable or disable ATR accordingly.
- By default one ATR per add-on will be present in the ATR list.

Image 17

➢ **Adding a shortcut – ATR example**

1. Type "cul" in the **Shortcut** text box. Next, type "call you later." in the **Expansion** text box (Image 18).	**2.** Tap on 'Done' to save the ATR shortcut or tap on 'Cancel' to discard the process (Image 19).

KPT PROPRIETARY
Copyright© 2013, KPT, All rights reserved.

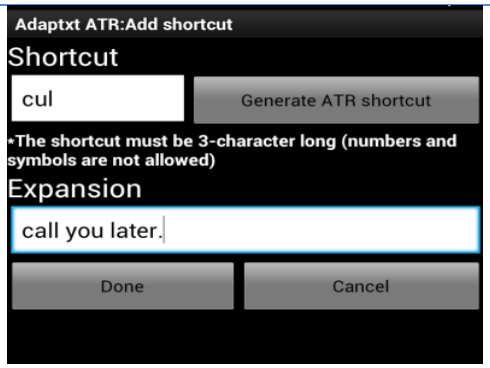

Image 18

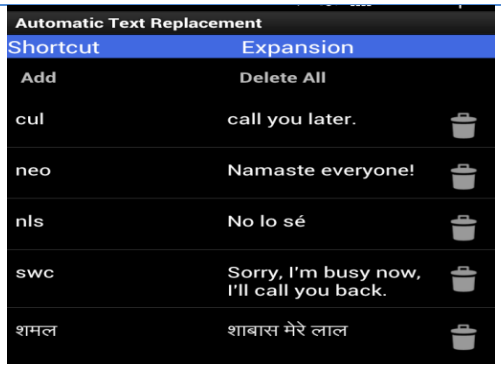

Image 19

3. Go back to message editor and type "cul" in the text box and the same word is shown in the suggestion bar as "+Cul" (Image 20).

Image 20

4. Tapping on "+Cul" will enter the expansion "call you later." in the text box (Image 21).

Image 21

➢ **Deleting a shortcut**

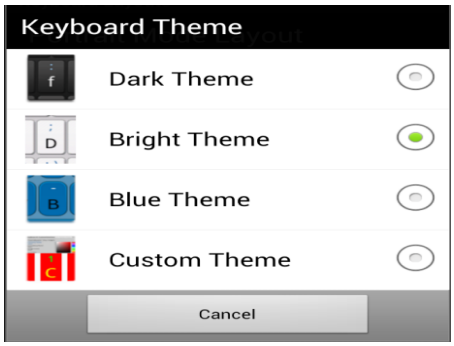
- To delete ATR words present in the list individually**,** press the bin symbol adjacent to the ATR word to be deleted.
- To delete all the ATR words present in the list**,** tap on **Menu key** > **Delete All** >**OK.**

13.7 Themes & Layouts

- **To access this feature**: Tap on **Adaptxt Settings** >**Themes and Layouts**.

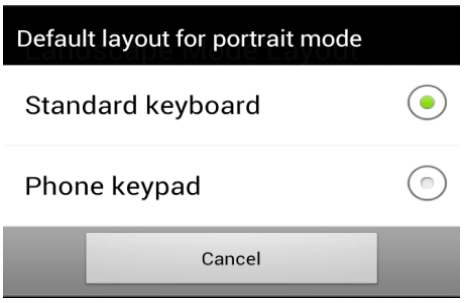
13.7.1 Themes

- To select theme: **Quick Settings Key>Themes>** Select the desired theme.
- Tap on the **Keyboard Theme** option to select between the provided themes, by default the theme is set as the **Bright Theme.**



KPT PROPRIETARY
Copyright© 2013, KPT, All rights reserved.

13.7.2 Layouts



- To select a keyboard layout: **Adaptxt Settings> Themes and Layouts> Keyboard Layouts**> Select the desired layout.
- The user can tap and choose between:
  - **Standard keyboard:** It provides a PC-like keyboard layout designed specifically for each language.
  - **Phone Keypad:** It provides a 12-key layout if available based on the language selected.

13.8 Auto Capitalization

- Selecting this option will automatically capitalize proper nouns, words at the beginning of a sentence and words based on punctuations.
- Tap on **Adaptxt Settings>Advanced Settings**>Tap on **Auto Capitalization** to enable/disable it.

13.9 Auto Correction and Revert Correction

13.9.1 Auto Correction

- Tap on **Adaptxt Settings>Advanced Settings**>Tap on **Auto Correction** to enable/disable it.
- The suggestion is displayed in **blue** font color along with a blue cross symbol on the left hand side of the word (Image 22).
- Tap on the **space key** to replace the mistyped word with the suggested word.
- Tap on the blue cross to dismiss the auto-corrected word.
- If the typed word is not present in any of the installed Adaptxt dictionaries, it will be saved in **My Dictionary**.
  Note: Auto Correction is enabled by default.

Image 22

13.9.2 Auto Correction Modes

- This setting is used to define the strength of auto correction; it is set to **Medium** by default (Image 23).

- Tap on **Adaptxt Settings>Advanced Settings**>Tap on **Auto Correction Modes** and choose from the three available modes: **High, Medium** and **Low.**

Image 23

13.9.3 Undo Auto Correction

- This feature allows a user to undo auto correction and revert back to the initially typed word using the Undo key.

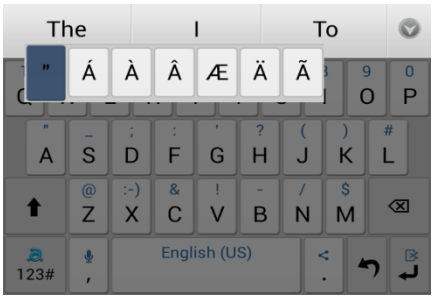
KPT PROPRIETARY
Copyright© 2013, KPT, All rights reserved.

13.9.4 Revert Correction

- This feature allows a user to revert back to the initially typed word instead of the suggested auto correction word.
- Place the cursor just after the auto corrected word and tap on the original word in the suggestion bar to replace the auto corrected word.

13.10 Extended Character Bubble

- **To access this feature**: **Adaptxt Settings >Advanced Settings >** Tap to enable/disable the feature.
- This feature displays special characters in a pop-up window.
- Tapping on each key will render different extended characters, example: The character “A” renders the following extended characters.



13.11 Support

- **To access this feature**: **Adaptxt Settings >Help>** **support@adaptxt.com**.
- This option allows the user to send an email to our product support team regarding feature requests, queries or concerns regarding Adaptxt.
- Tap on the option and Adaptxt will open the user configured email client, with predefined content in email address, subject and body fields.

14. Keyboard Screens

The Adaptxt keyboard consists of the following three screens:

1. **Primary Keyboard Screen:**

- This is the default home screen.
- To switch to Secondary keyboard, tap the **Quick settings key** once.

15. Other Keyboard Functions

15.1 Special Characters

To enter special characters like "[", "]","<" ,">" ,"{" ,"}" etc, the following options are available:

- On the **Primary** Keyboard press and hold the keys with special characters to render them on the editor (Image 24).
- Special characters can also be entered directly by switching to the **Secondary** and **Tertiary** keyboard screens (Image25 & 26).

15.2 Lower Case and Upper Case

- Press the **Caps key** on the keyboard once to switch from lower case to upper case or twice to enable caps lock. Tap again on the **Caps key** to return to lower case.
- Character keys and word suggestions will change case accordingly.

15.3 Smileys

- Long press on the **':-)' key** :-) on the keyboard to select and insert Smileys.
